Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This Office Action is in response to the amendment filed on October 26, 2007. Examiner acknowledges claims 17-25, 30-32, 35, and 36 are pending in this application, with claims 17, 18, 24, 25, 30, 31, and 35 having been currently amended, claims 1-16, 26-29, 33, and 34 having been cancelled.
2. The indication of allowable subject matter in claim 17 is withdrawn in view of newly discovered reference Young et al. (7,171,965). Rejections based on the newly cited reference follow. Accordingly, the finality of the rejection of the last Office Action is withdrawn. Finally, the amendment filed on October 26, 2007 has been entered.
3. Examiner apologizes for any inconvenience incurred by the Attorney and the Applicant to make this Office Action a non-final rejection. Examiner is more than willing to expedite prosecution by a personal or telephonic interview.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 17 is rejected under 35 U.S.C. 102(e) as being anticipated by Young et al. (7,171,965).

Art Unit: 3771

As to Claim 17, Young teaches a dry powder inhaler (20), comprising: a housing (22) having a mouthpiece (28) and a delivery passageway (represented by arrow 50, Figure 4) connected to the mouthpiece (28); a magazine (150) positioned within the housing (22) and including a plurality of reservoirs (160) for holding doses of dry powder, the magazine (150) being movable within the housing to sequentially position the reservoirs (160) within the delivery passage way (represented by arrow 50, Figure 4), the magazine (150) including a layer of moisture resistant, air-tight material (158) secured to an upper surface of the magazine (172) over the reservoirs (160); a cover (30) connected to the housing (22) and selectively movable to open and close access to the mouthpiece (28); a rake (88, Column 5, Lines 8-58) connected to the cover (30) and extending into the housing (22), the rake (88) being engageable with the magazine (150) so that upon movement of the cover (30) to open access to the mouthpiece (28), the rake (88) moves the magazine (150) and causes one of the reservoirs (160) to be positioned within the delivery passageway (represented by arrow 50, Figure 4); and a foil removal mechanism (the combination of 70 and 76) having a rotatable winding wheel (76) that peels the layer of moisture resistant, air tight material (158) from the upper surface of the magazine (172) as the magazine is moved. (Figure 10a).

Allowable Subject Matter

6. Claim 18-25, 30-32, 35 and 36 are allowed.

Response to Arguments

7. Applicant's arguments with respect to claim 17 have been considered but are moot in view of the new ground(s) of rejection.
